

AM200W-NZ

AM200W-NZ series provides a wide input voltage range of 300-1500VDC, power up to 200W to meet higher demands for high-power power supply in ultra-wide and ultra-high input voltage application, and high efficiency up to 87%, low power consumption and more energy-saving.

AM200-NZ series have input under-voltage protection to avoid frequent restart of system to maintain the system's stability. Offering MTBF over 300,000h, they have reverse input voltage protection, output short circuit, over-current and over-voltage protection. These protections greatly reduce the probability of failure of the power supply itself while greatly enhance the safety performance of the module power supply and the load under abnormal working conditions.

The series offers isolation voltage up to 4000VAC and high reliability, to effectively protect the safety of the system. They can be widely used in photovoltaic power generation, energy storage BMS, high voltage inverter and other industries.

Features

- Ultra-wide 300~1500VDC input voltage range.
- Operating Temp : -40 °C to +70 °C
- High I/O isolation voltage : 4000VAC
- Low ripple & noise : 200mV(p-p), typ..
- High reliability, Long lifespan : $\geq 300\ 000$ hrs
- Input reverse polarity and under voltage protection, output short circuit, overcurrent and overvoltage protection
- Meets 5000m altitude requirements
