

AMSROL-78NZ

Aimtec's AMSROL-78NZ series was developed to meet increasing market demand for compact sizes and higher efficiency. This 0.5A switching regulator hits the mark on these metrics with its 12.50 x 13.50 x 3.50mm open frame, ultra-low height design and efficiency of up to 95%. It is also a viable replacement to the LM78 linear regulator.

The series feature an ultra-wide input voltage range of 4.75-36V, continuous short-circuit and low ripple noise (typ.: 20mV). These models target a diverse range of applications such as industrial controls, IoT, grid power, instrumentation, mining and other related industries where limited board space is a key concern. This new series can accommodate operating temperature from -40°C to +85°C with full power up to 71°C.
